The Expanded Codesbooks provide easily understood information about each data field in the associated file. They contain for each data element the variable location, an abbreviated eight-character name, an expanded name, missing value codes, and the coding conventions used in creating the data files. The brief Codebooks present most of the information in the Expanded Codebooks in compressed form. While the Expanded Codebooks describe each data field in ten or more lines, the Brief Codebooks have one line for each data field. The Response Code files contain information about the scheme used to code the variable. This response information is referenced in the Brief Codebooks and is included in the Expanded Codebooks. The edit check files indicate whether individual pieces of information in a given record are consistent with other information in the same record according to specified consistency rules given in the textail documentation for the related data files.</p> <p><u>Disposition:</u> Destroy immediately. DISPOSAL BY DONATION TO THE INTER-UNIVERSITY CONSORTIUM FOR POLITICAL AND SOCIAL RESEARCH, ANN ARBOR, MICHIGAN.</p>
