ITEM GENERAL INFORMATION		
Item Title	Form 549E - Price Index Developers Identify Assessed Index Price vs. Calculated	
Item Description	<p>Reporting of transactions to natural gas price index developers in accordance with Docket No. PL20-3-000 Actions Regarding the Commission's Policy on Price Index Formation and Transparency, and Indices Referenced in Natural Gas and Electric Tariffs.</p> <p>Natural gas price indices are used to price billions of dollars of natural gas and electricity transactions annually in both the physical and financial energy markets. As such, having accurate and reliable indices that are developed in a transparent manner is critical to the efficient functioning of both natural gas and electricity markets. Additionally, natural gas price indices are often used to verify electricity supply offers in RTO/ISO markets from gas-fired generators to protect consumers against the exercise of market power and ensure proper price formation.</p> <p>This information collection identifies two types of data: 1) the data that market participants provide to price index developers (which we do not collect although we pay for that information via subscriptions) and 2) the information the price index developers provide to us every 7 years (essentially their applications to be commission approved).</p>

This schedule was signed outside of the ERA system using Standard Form 115.

NARA staff updated ERA to reflect this approval, moving the record schedule into an approved status. The approved status allows for generation of a PDF indicating that the schedule has been approved, and allows an agency to use the schedule in ERA to create transfer requests. The approved date in the system and on the PDF version of the records schedule reflects the system actions.
