# SECTION II -- PERMANENT AND NON-PERMANENT PROGRAM RECORDS

This section provides for the disposition of HRA permanent and non-permanent program records. Included are files relating to: grants, contracts, loans, training, awards, special projects for health professions, health facilities, and intergovernmental and international activities.

The distribution of Federal money through grants, loans, loan guarantees, cooperative agreements, interest payments, and other similar type programs is a major function of HRA. The disbursement of these funds must be done according to established legislation and the functions of each program. These records are grouped by the general nature of assistance they provide.

HRA utilizes formula grants for certain program purposes. The formula may be based on population, ethnic distribution, per capita income, enrollment, mortality, morbidity, the presence of federal activities, etc. There is also the discretionary grant under which HPA determines the grantee and the dollar amount of the specific grant(s) more subjectively.

Construction grants are awarded to provide support for building, expanding, and modernizing health facilities.

The examples of assistance cited above broadly indicate what HRA is authorized and required by Public Law and regulations to do.

Record copies of grants and contracts, with pertinent supporting documents, are located in the Division of Grants and Procurement Management, HRA. However, copies of grant and contract materials, as well as the bulk of documents accumulated through the day-to-day operations of these programs, are located within the Bureaus. These documents will be brought together when funds are terminated and/or the final payment received, to reflect one single package and called the Office of Record File (to include formula, discretionary, and construction grants).
