Series Title: Willy Burgdorfer Papers

Description: Records of Willy Burgdorfer, the discoverer of the Lyme disease agent. Burgdorfer's papers document his work at Rocky Mountain Laboratories as a scientist and administrator, his extensive contact and collaboration with other scientists worldwide, attendance at conferences, teaching and lecturing, and awards received. His laboratory and field work on Rocky Mountain Spotted Fever, relapsing fever, California encephalitis, Lyme disease, and other tick-borne or rickettsial diseases is documented in his laboratory notebooks, correspondence with other scientists, extensive photographic documentation of microscopic laboratory subjects, and one film. Materials from teaching, lectures, and conferences show his active and worldwide efforts to promote collaboration, communicate progress on research, and increase communication with the general public on tick-borne diseases. His service as an administrator at Rocky Mountain Laboratories, and other documentation of Laboratory governance, priorities, and planning is documented in annual reports and meetings with the Board of Scientific Counselors; there are also clippings and photographs relating to employees of the Laboratory and the Laboratory's history. There are extensive materials about the Lyme Disease Foundation's work. The collection also documents his awards and honors.

Dates: 1948-2003

Quantity: 15.5 linear feet

DISPOSITION: **Permanent.** Transfer to National Archives upon approval of retention schedule.
