SAFETY Act

NARA # *NI-563-07-23*

As part of the Homeland Security Act of 2002, Public Law 107-296, Congress enacted the SAFETY Act to provide "risk management" and "litigation management" protections for Sellers of qualified anti-terrorism technologies and others in the supply and distribution chain.

The aim of the Act is to encourage the development and deployment of anti-terrorism technologies that will substantially enhance the protection of the nation. Specifically, the SAFETY Act creates certain liability limitations for "claims arising out of, relating to, or resulting from an act of terrorism" where a Qualified Anti-Terrorism Technology (QATT) has been deployed. It also confers other benefits. Although there are many technologies that are important to protecting our homeland, the SAFETY Act "Designation" and "Certification" are designed to support effective technologies aimed at preventing, detecting, identifying, or deterring acts of terrorism, or limiting the harm that such acts might otherwise cause, and which also meet other prescribed criteria.

Sellers of a potential anti-terrorism technology, who want SAFETY Act protections, must apply to the Department of Homeland Security (DHS) using the appropriate forms, furnishing all of the requisite supporting data and information and successfully demonstrate compliance with the Act's specific criteria. DHS will perform a comprehensive evaluation to determine eligibility for SAFETY Act Designation or Certification. Technologies eligible for SAFETY Act protections include: products, equipment, services (including support), devices, and information technologies. The technologies must be intended to limit the harm that might result from acts of terrorism or to detect, identify, prevent, or deter such acts
