## REQUEST FOR RECORDS DISPOSITION-CONTINUATION

7. ITEM NO.	8. DESCRIPTION OF ITEM AND PROPOSED DISPOSITION	9. GRS OR SUPERSEDED JOB CITATION	10. ACTION TAKEN (NARA USE ONLY)
•	Individuals that possess, use, or transfer select biological agents and toxins are required to submit a Bioterrorism Preparedness and Response Act FBI Information Form (FD-961) and a set of fingerprints to the CJIS Division. CJIS then searches several internal databases, including the Integrated Automated Fingerprint Identification System (IAFIS) and the National Crime Information Center (NCIC) System, as well as external databases such as the DOD's dishonorable discharge records and the Bureau of Immigrations and Customs Enforcement's (ICE) registry of illegal/unlawful aliens. These searches assist in determining if the applicant is restricted from working with biohazardous material. The restrictions that prevent an applicant from obtaining access to certain biological agents and toxins are defined in Title 18, United States Code (U.S.C.), Section 175b. Assessment results are forwarded to the employing department or agency indicating whether or not the applicant is restricted from working with biological agents and/or toxins.  Security risk assessments are tracked through a Microsoft Access database. Individual case files are also created for each applicant.		
	Records related to the processing of individual applications for access to select biological agents and toxins. Included in the files are completed FBI Information Forms (FD-961), fingerprint cards, and correspondence or other documentation regarding the applicant's status.  DESTROY when 7 years old.	Superseded by job / Item not
