See attached for new item 145 under Part VI.	9 GRS OR SUPERSEDED JOB CITATION	10 ACTION TAKEN (NARA USE ONLY)

Employee Protection System (EPS)

Description:

The EPS database (formerly the Potentially Dangerous Taxpayer System (PDTS)) identifies taxpayers who pose a threat to the safety of IRS employees whose official duties may require personal contact with such taxpayers. The database contains information that relates to the taxpayer's ability to follow through with the assault or threat and information pertaining to the taxpayer's current tax issues. The database also identifies the IRS employee who reported the incident and employee witnesses, and information to identify the TIGTA agent who investigated the complaint.

Background:

OEP employees rely on Treasury Inspector General for Tax Administration (TIGTA) notification and investigation data to designate taxpayers as one of two indicators: Potentially Dangerous Taxpayer (PDT) status or Caution Upon Contact (CAU) status. The OEP employee uses specific criteria to determine the taxpayer's status, and then places an indicator on the taxpayer's file in the Integrated Data Retrieval System (IDRS) if the taxpayer meets the criteria for PDT or CAU status. On a daily basis (as required), five-year reviews are conducted to decide, based on established criteria, whether the taxpayer should be removed from the database. If the taxpayer meets one or more of the established criteria during the review, the taxpayer retains the indicator and remains in the database for an additional five years. If the taxpayer does not meet the criteria, the record is deleted after data stripped of personal identifiers is moved offline for trend/statistical maintenance.

a. Inputs:

Includes daily EPS referrals from TIGTA via file transfer protocol (FTP) scripts and manual updates from investigative case files. Data includes taxpayer identification, case summary, status information, and pertinent dates.

Disposition: Temporary Delete/destroy after input verification into EPS master file.

b. Master files:

Maintains data relevant to those taxpayers designated as either a Potentially Dangerous Taxpayer (PDT) or Caution Upon Contact taxpayer (CAU), including TIGTA investigation case file information, and reports regarding the status of those taxpayers.

Disposition Temporary Delete/destroy after PDT or CAU indicator is removed. Maintain data stripped of personal identifiers offline for an additional five years, then delete.

c. Outputs:

Reports and ad hoc queries pertaining to demographic information, number and types of designations, profiles of potentially dangerous taxpayers, and other relevant trend and statistical data.

Disposition: Temporary Delete/destroy when superseded or no longer needed.

d. System Documentation:

Codebooks and user guide

Disposition Temporary. Delete/destroy when superseded or obsolete
