1. National Transportation Statistics (NTS). These electronic records provide a compendium of selected national transportation, and transportation-related statistics from a wide variety of government and private sources. The data illustrate transportation activity for the major transportation modes - air, automobile, bus, truck, transit, rail, water, and pipeline. Basic descriptors such as operating revenues/expenses, number of vehicles and employees, vehicle- and passenger-miles, and passenger and freight operations, are included. Transportation trends in performance, safety, and motor vehicle sales, production and costs are also presented. Safety information compares data for transportation accidents, fatalities, and injuries for all modes of transportation as well as multimodal transportation of hazardous materials. Supplementary information include data on transportation and the economy, energy consumption, energy intensiveness, energy transport, and energy supply and demand.
