

Request for Records Disposition Authority

Records Schedule Number **DAA-0406-2019-0002**

Schedule Status **Approved**

Agency or Establishment **Federal Highway Administration**

Record Group / Scheduling Group **Records of the Federal Highway Administration**

Records Schedule applies to **Major Subdivision**

Major Subdivision **Office of Research, Development, and Technology**

Minor Subdivision **Office of Infrastructure R&D**

Schedule Subject **Long-Term Pavement Performance (LTPP) Database**

Internal agency concurrences will be provided **No**

Background Information **The Long-Term Pavement Performance (LTPP) program was established to collect pavement performance data as one of the major research areas of the Strategic Highway Research Program (SHRP). The first 5 years of the LTPP program were completed under the funding and direction of SHRP. Since 1991, the Federal Highway Administration (FHWA) has continued the management and funding of the program. The LTPP program is managed under the Office of Infrastructure Research and Development.**

The LTPP program is a large research project that includes two fundamental classes of studies and several smaller studies to investigate specific pavement related details that are critical to pavement performance. The fundamental classes of study are the General Pavement Study (GPS) and the Specific Pavement Studies (SPS). The combined GPS and SPS programs consist of over 2,500 test sections located on in-service highways throughout North America. The LTPP program will monitor and collect pavement performance data on all active sites.

Established in 1988, the LTPP Information Management System (IMS) is the central database where all the data collected under the LTPP program are stored.

Item Count
