1.

Central Correspondence Records

Correspondence created by the elements in the Federal Highway Administration. Up to 1978, these records were funneled to the Central Records Section (CRS) for filing and maintenance for 3 years after which they were transferred to the National Records Center in Suitland, Maryland. Although yellow official file copies, by definition, were maintained in the CRS, duplicate copies of important correspondence and the bulk of routine correspondence was retained in the originating office as part of their official files. The correspondence in the CRS was filed under the following categories:

1. By State (all correspondence regarding a particular State)
2. By Field offices (correspondence from our regional and division offices)
3. By foreign country (correspondence with foreign countries such as highway construction in foreign countries)
