	<p><u>Initial Forced-Outage Records</u></p> <p>When a generating plant is forced off the line, it must make a report of the incident in order to determine the cause of the shutdown and to determine what preventative measures should be taken to avoid recurrences of the same nature. Form TVA 9873, Initial Forced-Outage Report, gives unit conditions prior to shutdown and the action required to return it to service. Also included in the report is form TVA 9873A, Forced-Outage Review Committee (FORC) Outage Report which is a reporting of committee investigation of the incident.</p> <p>The report is used for reference and will have no administrative value after two years. The original copy is sent to the central office file and a duplicate is retained at the plant.</p> <p>The records have a Central Office Operations Group accumulation of 3.0 cubic feet and generating plant site accumulation of 3.0 cubic feet since the use of the record series began in 1979. The records are filed by plant in reverse chronological order by year and then date.</p>
