	control of the MAMS Automated Data Processing production system. Production run logs are used for compiling statistics regarding MAMS efficiency in monthly progress reports and for locating prior program versions when needed for reference. Version control logs are used in tracking movement and efficiency of MAMS production programs before and after the programs are put into operation. Because these logs have administrative value in ADP planning and control and in evaluating program efficiency, the requested retention periods will serve all administrative needs.		
1.	DISPOSITION: A. Version Control Logs - Destroy in agency when 5 years old. B. Production Run Logs - Destroy in agency when 1 year old.
