b. See disposition instructions.

DISPOSITION INSTRUCTIONS:

a. Keep inactive materials in office 5 years after file break, then retire to FRC Destroy when 20 years old

b. Delete when record copy is generated or when no longer needed for reference or updating.

APPLICATION GUIDANCE:

REASONS FOR DISPOSITION: Previously approved items 10 and 11 of NC1-412-85-14 have been combined into one item to reflect the way the records are maintained by the program office. Item 10, record copy of certification records, was previously approved by the National Archives as permanent. Proposed retention is based on the manufacturers' responsibility to recall and repair defective vehicles during their useful lives as defined by statute and regulations. The longest useful life is 11 years, therefore a 20-year retention is adequate for EPA's needs.

AGENCY-WIDE GUIDANCE: Electronic manufacturer submissions are covered by the Certification and Fuel Economy Information System (CFEIS) which is scheduled as EPA 485
